RE: Facility For Sample Notice at 12345 Somewhere

Reference #: **4C5-DA5-A9E**

Dear Water Customer,

The purpose of the Town of Kilmarnock's Cross Connection Control Program, as established by local ordinance, is designed to protect the public water distribution system from potential contamination. This program consists of two key components: (1) site inspections and (2) testing of backflow prevention assemblies.

Our records indicate that it is time to conduct a **cross-connection survey** of the backflow prevention assembly(s) at your facility. While there are no fees for the survey itself, please note that if cross-connections are identified, any costs related to the replacement, repair, modification, installation, and/or testing of backflow prevention assembly(s) will remain the responsibility of the property owner/manager.

To facilitate this process, the **Town of Kilmarnock** has contracted with **HydroCorp** to assist in administering the **Cross-Connection Control Program**.

Your inspection was previously scheduled on **N/A**; however, the inspector was unable to gain access to certain areas of the property required to complete the inspection. To ensure compliance and continued protection of our community's drinking water, **please contact HydroCorp to reschedule your inspection by 10/22/2025.**

Immediate Action Required

**This is the 3rd & final notice you have been sent regarding this matter.
Failure to comply could result in termination of water service &/or fines.**

We appreciate your cooperation in helping to protect our community's drinking water supply. If you have any questions or need further assistance, please contact **HydroCorp** at **1-844-493-7641** (available Monday through Friday, 8 AM - 8 PM EST) or visit **watercustomer.com**.
